## **DETAILED ACTION**

### ***Election/Restriction***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-11, 31-36, and 18-21, drawn to devices and kits, classified in class 422, subclass 58.
  - II. Claims 12-15, drawn to a method of manufacturing a device, classified in class 435, subclass 4.
  - III. Claims 16-17 and 37, drawn to a method of manufacturing a device, classified in class 427, subclass 466.
  - IV. Claims 22-30, drawn to a method of detection, classified in class 436, subclass 524.
  - V. Claim 38, drawn to a method of synthesizing an oligopeptide, classified in class 514, subclass 2.
  - VI. Claims 39-41, drawn to a method of synthesizing an oligonucleotide, classified in class 514, subclass 44.
  - VII. Claims 42-44, drawn to a method of performing a chemical synthesis, classified in class 514, subclass 2 or 44.

Art Unit: 1641

2. The inventions are distinct, each from the other because of the following reasons:

Inventions IV-VII and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process such as any one of the methods recited in Groups IV-VII.

3. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as the method of Group III.

4. Inventions III and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the

Art Unit: 1641

different inventions the product as claimed can be made by another and materially different process such as the method of Group II.

5. Inventions II-VII are all unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the methods of Groups II-VII are not disclosed as capable of use together and they have different modes of operation, different functions, and different effects as shown by the different steps recited in each of the methods in each group.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently

Art Unit: 1641

named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chris Chin whose telephone number is (703) 308-3991. The examiner can normally be reached on Monday-Thursday from 10:00 am to 7:30 pm. The examiner can also be reached on alternate Fridays.
